PROFILE

Backend developer working with Python, Node.js and TypeScript, using Django and NestJS to build web applications and REST APIs. Experience across CRM, e-commerce, appointment booking and online education. Focused on data modeling, authentication, access control and maintainable modular code. Also develops Next.js frontends on selected projects.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Backend: Node.js, NestJS, Django, Django REST Framework

Frontend: Next.js

Databases & ORM: PostgreSQL, MySQL, SQLite, TypeORM

APIs & security: REST APIs, JWT, refresh tokens, role-based access control

Tools: Git, GitHub, Docker, Swagger/OpenAPI, Postman

PROFESSIONAL EXPERIENCE

Backend Developer | Freelance

October 2021 - July 2026

- Developed backend services and REST APIs with Python and Django for client projects.
- Implemented authentication and refresh-token flows, designed data models and worked with relational databases.

Web Developer | Abangostar Badiz

2025 - 2026 | Bahman 1403 - Esfand 1404, Solar Hijri

- Developed modular backend services and business logic using NestJS and TypeScript.
- Implemented API validation, authentication and authorization, with a focus on maintainable code.

Web Developer | Mehrnaz

2026 | Ordibehesht - Tir 1405, Solar Hijri

- Developed backend services with Node.js and Django, including work on an online education platform.
- Built REST APIs and authentication flows using a modular application structure.

EDUCATION & TRAINING

B.Sc. in Civil Engineering | Islamic Azad University, Mashhad

1392 - 1397, Solar Hijri (approximately 2013 - 2018)

Advanced Python course | Maktabkhooneh

SELECTED PROJECTS

Dental Clinic CRM

Node.js | Next.js | PostgreSQL | VoIP

Customer relationship management system undergoing real-world pilot testing in a dental clinic. All implemented features, including VoIP, are operational and being tested.

- Customer and lead management, sales pipeline tracking and interaction history.
- Tasks and reminders, role-based access control and reporting.

Fares Industrial Store - In Development

Next.js | NestJS | PostgreSQL

Online store for pipes, fittings and industrial tools.

- Responsible for the complete project from scratch, including frontend, backend and database development.

Mr Apple | Personal Project

Python | Django | PostgreSQL

E-commerce backend covering the product catalog, shopping cart, orders and payments.

- Implemented OTP login and JWT authentication.
- Developed store and management APIs and integrated payment verification.

Barber Shop Management | Personal Project

Python | Django | PostgreSQL | REST APIs

Appointment booking and management backend for a barber shop.

- Service and work schedule management, available time slots and booking flows.
- Separate customer, barber and owner roles, with management dashboards and APIs.

Abangostar Backend Platform

NestJS | TypeScript | TypeORM

Backend development during employment at Abangostar Badiz.

- Portfolio and contact request management with input validation and API documentation.

Mehraz Academy

Node.js | REST APIs

Backend development for an online education platform.

- Course management, user registration, content delivery and authentication.
